RCM - THE GOALS

- Incentivize deans to be entrepreneurial and responsive to changing market
- Grow revenue rather than just cutting costs
- Facilitate strategic and long-term planning
- Continue to "bend the cost curve" and focus on both efficiency and quality
- Promote administrative efficiency, reduce service duplication and enhance space utilization
- Realign resources with academic priorities
- Reward strong management and performance
- Foster a climate of transparency and accountability

GUIDING PRINCIPLES

Mission-driven: The budget model reflects Temple's primary mission to support its teaching and research enterprise first, and its goals and success supersede those of the individual units and revenue centers.

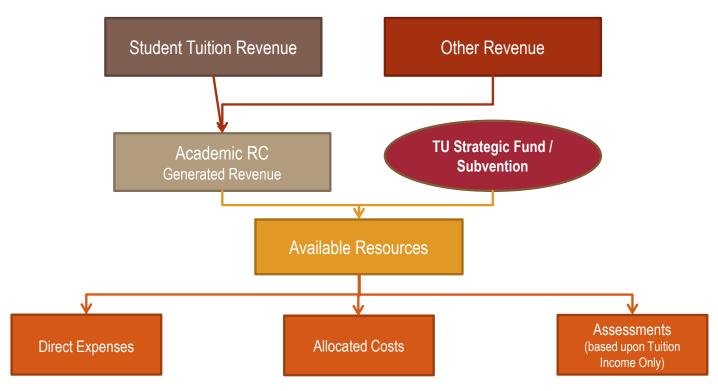

Align Authority with Responsibility and Accountability: Authority to make decisions will be pushed closer to the action, along with the responsibility or accountability for such decisions.

Fairness: Be consistent, predictable and transparent. Considers a student-focused approach to the delivery and funding of services to ensure equitable access.

Encourage Innovation, Entrepreneurship and Efficiency: Incentivize appropriate risk taking and efforts to enhance revenue or reduce expenses. Support interdisciplinary collaboration and discourage unnecessary internal competition.

Simplicity: Simple to understand, explain and maintain.

RCM REVENUE FLOW

STRATEGIC FUND

- Annually assessment of \$7.0 million from the schools and colleges
- Adjustment occurs via the subvention line
- Is a permanent adjustment in resources to the schools and colleges
- Vehicle to move resources from one school to another based upon strategic priorities
- Funding can be used for one-time strategic initiatives or permanent investments
- Issues
 - Has the fund been used strategically over the years?
 - What are the strategic priorities that we can link to these resources?
 - Is the assessment sufficient or too much?
 - The assessment is like a budget reduction can the schools continue to afford it without the growth in tuition revenue?

ADMINISTRATIVE LABOR SPEND

^{*}Administrative Intensity Measure (AIM) = Total Administrative Spend divided by Total Labor Spend
